R E P O R T

OF

The Committee of Visitors

OF THE

County Lunatic Asylum,

AT THE

EPIPHANY SESSIONS, 1859.

Southampton, to wit.—At the General Quarter Sessions of the Peace of Our Sovereign Lady the Queen, holden at the CASTLE OF WINCHESTER, in and for the said COUNTY OF SOUTHAMPTON, on Monday, in the first Week after the twenty-eighth day of December, One Thousand Eight Hundred and Fifty-eight, to wit, the fourth day of January, in the twenty-second year of the Reign of Our Sovereign Lady VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, and in the year of our Lord One Thousand Eight Hundred and Fifty-nine, before THE RIGHT HONORABLE CHARLES VISCOUNT EVERSLEY, Chairman, SIR WILLIAM HEATHCOTE, BARONET, and others their Fellows, Justices of our said Lady the Queen, assigned to keep the Peace of our said Lady the Queen, in the County aforesaid: and also to hear and determine divers Felonies, Trespasses, and other Misdeeds, committed in the same County:—

By the Court.

ORDERED, that the Report of the Committee of Visitors of the County Lunatic Asylum, presented to this Court, be printed, as soon as the Receipt and Expenditure Accounts are duly received, and that Copies be transmitted to the several acting Justices, and to the Boards of Guardians of the several Unions within the County.

FARR.

REPORT.

*To Her Majesty's Justices of the Peace for the County of
Southampton, in General Quarter Sessions
assembled.*

THE Committee of Visitors of the County Lunatic Asylum, in presenting the usual Annual Report to the Magistrates of the County, have the gratification to announce, that the Asylum, under their supervision, continues in a satisfactory state, and reflects much credit upon the Medical Superintendent, and those to whom its management is more immediately entrusted.

General
Statement.

The pressure upon the Asylum accommodation has been unusually severe during the past year, particularly upon the Female division of the Institution; but your Committee are pleased in being able to inform the Court, that no application for the admission of County or Borough Patients, situate within the County, has hitherto been refused. Several chronic, harmless Patients have been transferred from the Asylum, to Workhouses where the Guardians were willing to receive them, in whose hopeless condition, there existed, if kept in the Asylum, no reasonable expectation of amelio-

Crowded state
of Asylum, and
suggestions for
relief.

rating, by any remedial treatment whilst resident therein ; and it becomes a question worthy of consideration, whether it is expedient, or desirable, that so many demented, harmless, and incurable persons, should be sent to the Asylum, and there retained, to the eventual exclusion of urgent recent cases, or whether the Institution should not be regarded more in the light of a purely Curative Hospital. There can be no doubt, that in this County, as is the case in many others, a vast proportion of the Insane confined, at the present moment, in the Pauper Lunatic Asylums, belong to the class named chronic, and incurable, and do not require the same amount of constant attention and medical treatment, as recent and more hopeful cases ; and your Committee would respectfully submit, that if the Asylum was kept disencumbered of these cases, upon which all medical treatment has proved unavailing, and which might be treated elsewhere, where suitable Workhouse accomodation is at hand, the curative means afforded by the Asylum would be, thereby, rendered applicable to a larger number of curable Patients, and the necessity of a further extension of the Asylum, or the erection of a second Institution, might be obviated ; which is threatened, at no great distance of time, by the progressive increase of Lunacy. In this County, however, the subject of increased accommodation for Insane Paupers does not press for an immediate solution, as your Committee entertain a hope, that when the Chichester and Poole Patients are removed to their respective Asylums, which they expect will be the case, during the present year, the vacancies then created, will afford adequate accommodation, to meet the wants of the County for some time to come.

Additions and
Alterations.

Certain needful additions and alterations have been carried out during the year. The efficiency and less wasteful distri-

bution of the water supply, has been under consideration, and has been greatly improved, by the adoption of measures suggested by the County Surveyor. In the latter part of the month of October, on account of the long drought, the Asylum well gave out, and considerable anxiety existed as to the means by which an ample supply of water could be most readily obtained, the consumption of which amounts, daily, to 20,000 gallons and upwards. Having consulted Mr. Stopher, the County Surveyor, the Committee at once resolved to deepen the well, and its adjacent chambers, 9 feet, and they have the satisfaction of stating, that this simple remedy has had the desired effect.

A new auxiliary Steam Engine of six-horse power, which was stated would be required, at the time the Asylum was built, has been erected by Messrs. Easton and Amos, for the purpose of pumping the water supply into the tanks, and, as your Committee are assured, not before it was needed, as, upon an examination of the original Engine, it was found to require considerable repairs ; and serious would have been the consequences, if any part of it had given way so as to have prevented its efficient working, previous to the erection of the new supplementary Engine.

Erection of
New Engine.

These new works have been carried out by the several tradesmen, to the satisfaction of Mr. Stopher, and comprise the whole of the additions, of any consequence, ordered by the Committee during the present year. The cost of them will be found fully stated in the Financial Accounts appended to the Report.

The most careful attention has been paid to economy, in matters connected with the Maintenance Expenditure ; and it must be gratifying to the Court to know, that the cost of

Reduction in
Maintenance
charge.

Maintenance, during the year 1858, has been reduced from 9s. to 8s. 6d. per head per week, without, it is hoped, curtailing the comforts of the Patients.

Health of
Patients.

In consequence of the crowded state of the Asylum, and the very infirm condition in which many of the Patients were admitted, more particularly as regards cases of a Paralytic and Epileptic nature; confining as many as from 20 to 30 Patients to their beds at one time; the general health of the Patients, during the year, has been below par, as compared with former years. The Institution, however, has been free from all epidemic disease, with the exception of three or four cases of Measles of a mild character.

Erection of
State Criminal
Asylum.

The Court will probably remember, that the Committee of Visitors, in their Annual Report for 1857, urged upon the Magistrates of this County the desirability of pressing upon the notice of the Government the necessity which had arisen throughout the Country, for the erection of a State Criminal Asylum. The Committee have now the pleasure to report, that it has been resolved by Government at once to provide accommodation for this class of Patients, by the construction of a new State Asylum. The site for that purpose has been selected, and the plans for its erection have been approved of by the Secretary of State.

Tables.

The usual Tables are in course of preparation, as well as the Financial Statement, and will be presented to the Court at the next adjourned Sessions. They will afford complete and ample information of the general working of the Institution, both with reference to the employment of the Patients, to Medical Statistics, and the general economy of the Asylum.

Financial
Statement (ap-
proximation.)

The nearest approximation of the Receipt and Expenditure Account, which your Committee are enabled this day to

produce, shews, that during the past year, the Receipts from all sources, exclusive of Balances, have amounted to £13150, and the Expenditure, to £12710:18:7, in which latter Sum is included a payment of £550, constituting the second Instalment, with Interest, upon the Loan of £1500, raised by the authority of the Court, at the Michaelmas Sessions, 1856; leaving only one more Instalment of £500, with one year's Interest, to be liquidated during the present year, to clear off the whole of the above-mentioned debt.

In March last, Mr. Morrison was appointed to the post of Clerk to the Visitors, and Clerk to the Asylum, on the resignation of Mr. E. Jones; and the vacancy which occurred in the office of Assistant Medical Officer, was filled up on the 7th August, by the selection of Mr. Moxey, M.D., of Edinburgh.

Appointment
of Officers.

WM. HANS SLOANE STANLEY,

Chairman.

WICKHAM,

December, 14th, 1858.

MR. CHAIRMAN, MY LORDS, AND GENTLEMEN,

It again devolves upon me to lay before you my annual Report, the fourth which it has been my duty to present. The yearly retrospect of Ministerial experience, however peculiar its sphere, or limited its range, must ever be associated with grave and serious reflections. Perhaps, at no period, are we so keenly alive to the great and solemn interests connected with our Office, or feel more deeply our responsibilities, or scan, with more anxious earnestness, the measure of blessing that has been visibly granted to rest upon our labours.

If, on reviewing the past year, there be no striking incidents to record, yet, it is with the greatest thankfulness, I acknowledge the many encouragements experienced, and rejoice that there is nothing to detract from the cheerful character of the Report.

The Religious Services of the Institution have been conducted under the same satisfactory circumstances as heretofore; and I can but testify, with others similarly engaged, to the apparent beneficial influences of religious exercises and instruction on many of those afflicted with

mental maladies—of those, who, by the Divine blessing and medical skill and treatment, have been restored to their friends, we would fain indulge the hope, that some, at least, have left the walls of their temporary Asylum, with serious thoughts awakened, or impressions deepened, and determined thankfully to dedicate their recovered faculties to Him, who has done such great things for them.

Since my last Report, the Holy Communion has been administered quarterly, as usual, and of those who have departed from among the living, forty-two lie interred in the Cemetery, and their names have been duly inserted in the proper Register.

Regarding it as a privilege, under any circumstances, to make known Gospel truths, and to minister to the spiritual wants of the afflicted, it may be allowed me here to express my unabated interest in the work to which I am commissioned, and my humble wish to promote, in every way, compatible with established regulations, the best and highest interests of your valuable Institution.

I am,

Your very faithful and obedient Servant,

G. H. MASON,

Chaplain.

The Chairman,

Hants County Lunatic Asylum.

HAMPSHIRE COUNTY ASYLUM,

December 27th 1858.

MR. CHAIRMAN, MY LORDS, AND GENTLEMEN,

The chief occurrences of the past year have been reported to you, from time to time, at your various Committee Meetings ; but, I venture to hope, that those which I now select for the sixth Annual Report, will give a general history of this Asylum, for the year 1858.

During the early part of the statistical year, an unusually heavy mortality occurred : as many as 18 Patients having died before the end of February ; of these, 14 were affected with either Epilepsy or Consumption, or a combination of the two diseases. Epileptic Fits were indeed very prevalent in the House at that time, and several Patients, not known to be previously subject to Epilepsy, were attacked, and in one such case, fatally. Another Patient, was, for a period of three days and three nights, in an uninterrupted succession of Fits, but eventually recovered.

On the 5th of January, an excitable old man, in a struggle with an Attendant, fell, and broke his leg. The case received your strict investigation on the 16th of the same month, when you arrived at the conclusion, that the injury was purely accidental.

On January the 30th, I brought before the notice of the Committee, then assembled, the 53 Sect. of the present Lunacy Act, when they resolved, "To give power to, and authorise, the Medical Superintendent of this Asylum to exclude from, and refuse admission to, all persons suffering from infectious and contagious diseases which, in any way, shall be considered by him to endanger life."

On February the 12th, the newly erected Gas Retorts were heated, and the result has since been most satisfactory. The consumption of Coals has been much reduced, and the supply of Gas is now amply sufficient for even the extended accommodation of the Asylum.

In March last, a room, in the Female junction block, was opened as a Dormitory for Patients employed in the Laundry; and since then, a second room adjoining the former has been appropriated as a sleeping room for the Females occupied in the Kitchen. This arrangement has afforded us increased accommodation for 16 Female Patients; a matter of great moment, when the large preponderance in the number of females over males in the House is considered.

About the period of Easter, a Male Patient, who subsequently died from maniacal exhaustion, caused me great anxiety, by his constantly repeated attempts at self-destruction; so much so, indeed, that for a considerable time, I was obliged to employ a special Attendant for him, and he was never left by himself till the hour of his death.

Towards the latter end of April, about the middle of July, and again, about the middle of August, Epileptic Fits were very numerous and severe amongst the Patients on each side of the House. Numbers of the Epileptics having suffered from severe paroxysms simultaneously.

During the month of May, a Male Patient, living at the Wickham Lodge, was attacked with Measles. He was kept isolated from the Asylum, and all the other Patients, residing in the Lodge, were transferred to the Asylum. A second Patient in the Farm Ward shortly afterwards took the complaint, and, subsequently, a child living at the same Lodge was attacked. All suffered only in a slight degree, and the disease did not spread further. With this slight exception, there has been no kind of epidemic in the House, and the Patients generally have been free from illness.

On the 7th of June, a hundred Patients, namely, fifty of each sex, were taken to a Pic-nic on Portsdown Hill, and enjoyed themselves very much, giving me no cause to regret the confidence reposed in them.

On the 10th of the same month, a Male Epileptic Patient died from suffocation—a small orange, given him by his sister, who had recently visited him, having become impacted in his throat, during an attack of Epilepsy.

On three different occasions, during the summer, our Patients, with their Attendants, engaged in friendly games of Cricket (on our own ground) with our neighbours, members of the Wickham Club—the preliminaries for the Matches having been previously satisfactorily arranged between the Secretary of the Club and myself, for the prevention of admission into the Asylum field of strangers or persons not connected with the game, and for the due observance of order and decorum.

On July the 26th, a large party of the Patients, Male and Female, were taken to a pretty spot in the neighbourhood, to a rural tea-drinking, where they were visited by one of

your Committee, who happened casually to have called at the House as they were about to start. That Gentleman, on his return to the Asylum, made the following entry in the Visitors' Book :—

“ A large number of the Patients are just on the point of starting for a tea meeting in the neighbourhood. —5 o'clock. I have just been out to the meeting, and was much satisfied with the orderly and happy appearance of the 120 Patients who were present.”

On the 7th of August, I found it necessary to call your attention to the crowded state of the Female part of the building, and to report that we were then accomodating more women than we really had room for ; and I proposed, that some of the chronic, harmless, incurable cases, should be removed to the Union Houses of the Parishes to which they belonged, provided the respective Boards of Guardians were willing to receive and undertake the proper care of them. In the first instance, the New Forest Union was selected, and two old women sent there. This arrangement being found to act in a satisfactory manner, in that particular instance, two more old women were sent to the Fareham Workhouse, and, since then, some Isle of Wight Patients, of a similar character, have been transferred to the House of Industry, at Carisbrooke. From inquiries, I have since made, I find that all the Patients I thus recomended for discharge, have continued to be harmless, and are well tended to, and allowed the extra diet, and the little indulgences that their cases require.

There are, at the present time, in the Asylum, at least 50 Patients, who might, under favorable circumstances, be removed to their respective Union Houses, and, of this number, about two-thirds are Females.

There cannot be the least doubt, that it should be the primary business of all Parochial Authorities to remove to their County Asylums, without delay, all Paupers laboring under an acute form of Insanity, or dangerous Chronic cases, or Idiots, that are neglected, and improperly taken care of; but the propriety of sending all Epileptics, Demented persons, and Idiots, to an Asylum, seems to me to be very questionable. I cannot help here quoting the judicious remarks of the Editor of the Asylum Journal on this subject. The following passage occurs at pages 580-1, of the 26th number :—

“ We have long been painfully impressed with the utter want of system, which generally prevails, in the manner of sending Insane Paupers to County Asylums. As a rule, the transmission of a Patient to the Asylum depends far more upon the trouble he gives at a Workhouse, or in his own house, than upon any other consideration. An Idiot, who makes a howling noise, or tears his clothes, is sent to the Asylum, while a curable Melancholic is detained from it. A case of Dementia of twenty years standing, if of uncleanly habits, or restless at night, is sent to an Asylum, while a case of recent and curable Mania, whose manifestations are not violent, is left to languish in the Workhouse Ward. On the other hand, there are hundreds of Chronic Insane, confined in County Asylums, who, under proper supervision, would be harmless and happy in the cottage homes of their relatives and friends, if a fair allowance for their maintenance, and sufficient medical attendance were provided, under authorities whose primary consideration was not that of economy; and there are numbers

of Idiots, filling up valuable space in Asylums, for whom Idiot Wards might be arranged, with every security for their proper treatment, if such wards were placed under frequent inspection and control of persons who understood the wants and management of these unfortunate beings."

On the 24th of August, Dr. Nairne and Mr. Campbell, two of Her Majesty's Commissioners in Lunacy, visited the Asylum, and made a report, of which the following are extracts :—

"We have gone over the whole of the premises, and examined all the Inmates, who were generally orderly and tranquil, and their clothing and bedding clean and good. * * * *

"We noticed a number of old Chronic cases, some of whom, if properly attended to, might probably do well in their respective Workhouses ; but, without a guarantee, that they would receive better diet and treatment than is usually afforded in Workhouses, it would be useless, as well as cruel, to promote their removal.

"We were glad to find a large number of men actively engaged in Farming operations ; a large number of Patients, of both sexes, are regularly employed in various trades and occupations ; and all the clothes, shoes, bedding, &c., are made on the premises, and by the Inmates, with very little assistance.

"All the wards are clean and in good order."

On the 18th September, a Male Patient, employed in hoeing turnips, in a part of the field near the copse, slipped into it, and made his escape. Having been helped on the

road by a carriage that was passing, he gained a long start on the Attendant who followed him, and reached Salisbury before he was retaken.

On the 5th of November, another Male Patient, who had been taken to Wickham to see some fire-works, contrived to elude the vigilance of those who were with him, and was not retaken. He was an Irishman, and had formerly been a Soldier. He had always been of wandering habits and never had a fixed home. He had very much improved since his admission, and would probably soon have been discharged. For several months he had been treated with every confidence, and allowed an unusual amount of freedom, no one having anticipated that he was likely to abscond.

The Services in the Chapel have been performed by the Chaplain, as usual. The attendance of Patients has been about the same as during the year 1857, and their conduct has invariably been decorous and attentive.

The recreations of the Patients have taken place, for the most part, at fortnightly intervals; the amusements having been occasionally varied by concerts, theatricals, and tableaux vivants.

Forty-two Interments have taken place in the Asylum cemetery during the year just ended.

The Tables appended, show the character of disease and the state of bodily health of each Patient admitted during the year, and readily account for the small per centage of recoveries that has taken place; whilst the Obituary Table records the fact, that eleven of the Patients, who have died during the past year, survived their admission into the

Asylum, on an average, only thirty-one days each. Several other Patients lived for very short periods, still they were fit objects for the Asylum. The eleven, however, to which I specially call attention, presented no prospect whatever of recovery, and in neither of them could I recognize the necessity for admission into an Asylum.

To remove to a distance from their friends, persons already on the brink of the grave, when only a little extra care and attention is required to soothe their last moments, I regard as an act amounting to little less than cruelty.

I have to report, in a very favorable manner, of the general conduct of the Servants employed in the Institution during the last year, and to thank the various Officers for the valuable assistance they have given me, in conducting the business of the Asylum.

In conclusion, I beg to offer my thanks, to you, Mr. Chairman, My Lords, and Gentlemen, for the kind co-operation you have invariably afforded me, in the execution of my duty, and to assure you, that

I remain,

Your obedient and faithful Servant,

JOHN MANLEY.

*To the Committee of Visitors,
Hants County Asylum.*

TABLE, No. 1,

Shows the number of Patients in the Asylum, December 25th, 1857, the number of Patients admitted and discharged during the past year, and the number remaining in the House on the 25th December, 1858.

	Males	Females	TOTAL
On the 25th December, 1857, there were in the House . . .	230	265	495
Admitted up to December 25th, inclusive	49	90	139
Total, under Treatment	279	355	634
